DETAILED ACTION

Drawings

The drawings (5, 6, 8, 13) are objected to because block (106/107) is misspell. "DETETOR" should correctly be --DETECTOR--. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary. the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/814,617

Art Unit: 2817

Claims 1, 10, 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, it is not clear which "bias circuit" is intended. Should "bias circuit" be --bias control circuit--?

Regarding claim 10, a combination of "a switching device", "detector" and "bias circuit" is not seen in a single embodiment. Does applicant mean a "control circuit (109)" of Fig. 13 is the "bias circuit" claimed?

Regarding claim 19, it is not clear which "a method" is intended. It is noted that claim 12 is an APPARATUS claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Application/Control Number: 10/814,617

anticipated by Canyon et al. (6,646,511).

Art Unit: 2817

Claims 1, 5, 7, 8, 12, 15-19, 49-55 are rejected under 35 U.S.C. 102(e) as being

Regarding claims 1, 12, 15, 51, Canyon et al. (Figs. 1, 9) disclose a power amplifier system comprising: a power amplifier (PA/150); a switching regulator (160) having an inherent switching transient; a power/current meter (180) operable as a detector circuit for detecting switching transient of a power amplifier; and a controller (170) coupled to the switching regulator can be read as a bias control circuit which is capable of applying a signal to decrease the settling time of the switching regulator (160) during a detected switching transient and producing a control signal thereof, and the switching regulator is operable to provide regulated power to the power amplifier.

Regarding claims 5, 16, wherein power/current meter (180) read as a detector which continuously detects a voltage level based on the control signal.

Regarding claims 7, 8, wherein the controller (170) is capable of producing a bias current/voltage to the regulator (160).

Regarding claims 17, 19, wherein the claimed operations are inherently seen in the controller (170) and switching regulator (160).

Regarding claims 49, 52, wherein switching regulator (160) is a voltage regulator.

Regarding claim 50, 54, wherein switching regulator (160) is capable of operating as a current regulator.

Regarding claims 53, 55, wherein the signal claimed having both bias voltage and bias current.

Art Unit: 2817

Allowable Subject Matter

Claims 2, 13, 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10, 20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 2, 13, 14 call for, among others, a timer circuit.

Claims, 10, 20 call for, among others, a switching device/circuitry.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 2817

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional reference (Zimmerman (5,635,872)) shows further analogous prior art circuitry which teaches power supply control circuit.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khanh V. Nguyen whose telephone number is (571) 272-1767. The examiner can normally be reached from 8:00 AM - 3:30 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571) 272-1769. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9306 for After Final communications.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov.
